

History of Iran Khodro Investment Development Co.

Iran Khodro Investment Development Company (IKIDO) started its activity in 1998 aiming at organizing investment activities of all companies affiliated to Iran Khodro Industrial Group (IKCO) in order to increase their capacities and to supply automotive parts and components required for the manufacturing lines of IKCO.

Since it was necessary to enter finance and capital markets, IKCO decided to lay the groundwork for its economic activities in IKIDO. Therefore Iran Khodro Industrial Development Co. (Private Joint Stock) was renamed as Iran Khodro Investment Development Company (Public Joint Stock) in late 2003 and the mission of the company switched from manufacturing capacity building to capital management through investment in companies, initiating new profit making economic entities and entering the capital markets.

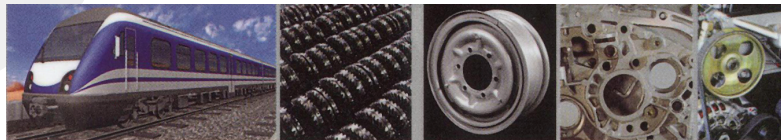

IKIDO as the first investment development holding company in automotive industry, has played a major and priceless role in developing and finalizing auto industry value chain. In compliance with its mission statement, IKIDO is aiming to achieve the title of the most outstanding local investment company as well as gaining a constant and effective presence in International markets and Industrial and financial areas.

شرکت ریخته‌گری آلومینیوم ایران خودرو
Iran Khodro Aluminium Casting Co.

Activity

The company was established in 2000 to produce different types of cast iron part for light vehicles. Executive operation of the project began on 4/5/2003. Hot commissioning of the machinery was started on 5/12/2005. Begin production from June 2006 and began pilot production in terms of Ramp up as formal 31/5/2006 took place.

Products

Cast iron cylinder block
crankshaft
safety parts (pivot, suspension arm, brake drum,
other cast iron parts for export (fly wheel, housing)

Technical know-how

the technology required for the production of cylinder block from German HWS and for safety parts from German Hansberg
the technology required for muscle building from German Fritz Hansberg with an advanced automation system
The company possesses green sand molding lines, cold box muscle-building line and robotic line for performing non-destructive testing on the safety parts

Capacity

The production lines of HWS' cylinders and Hansberg's safety parts have a capacity of 40,000 tons.

Activity

The company was established in 1977 as a company affiliated to the former khavar industrial Group (currently Iran Khodro Diesel) in the industrial town of Kaveh. It came on stream in 1981 with a nominal capacity of 3000 tons per annum by one working shift only. Our capacity increase in some step and in 2010 our capacity is 13200 ton / year. This factory admitted in Tehran Stock Exchange in 1996

Products

Various types of leaf spring
Tension clamp

Various types of parabolic spring
Various types of stabilizer bar

Coil spring

Technical know-how

The leaf spring of khavar spring Mfg. Co, are produced according to the latest technology of HEUSER (Germany) and NHK (Japan) and as per DAIMLER BENZ (Germany) know-how and inline with the demands of leading car manufacturing companies. The company is capable of producing all types of spring for various trucks, mini trucks, trailers, passenger cars and pickups. Coil spring and stabilizer bar produce according the license of DAEWON (korean)

Our capacity

Leaf spring = 6000 tons / Coil spring = 2500 tons

Stabilizer bar= 1250 tons / Parabolic = 2000 tons

Tension clamp = 700 tons / torsion bar with 750 ton/year capacity (not produced now) .
